LOCAL GOVERNMENT COUNCILS' PERFORMANCE AND PUBLIC SERVICE DELIVERY IN UGANDA

Wakiso District Council Score-Card Report FY 2013/2014

Authors: Susan Namara - Wamanga, Martin K. Ssali and Rona Ainembabazi

BACKGROUND AND RATIONALE

This brief presents findings from the score-card assessment conducted during the FY2013/14 for Wakiso District Local Government (WDLG) under the Local Government Council Scorecard Initiative (LGCSCI). This initiative is an evidence based project implemented by ACODE in partnership with ULGA with support from the DGF. The initiative seeks to enhance the effectiveness of elected leaders in fulfilling their mandate and build the citizens' capacity to demand better services. LGCSCI uses a score-card as an assessment tool to complete annual performance assessments on the district council, district chairperson, speaker and councillors by focussing on their roles and responsibilities as stipulated in the Local Government Act (as amended, 2010).

The rigorous assessment process is conducted by teams of researchers across the 30 districts that undergo the annual LGCSCI score-card assessment. The research process involves a review of key district documents, interviews with key respondents, consultation with citizens through focus group discussions (FGDs) and the cleaning and analysis of data with final district reports produced for each of the districts (available online; <u>http://www.acode-u.org/</u>). LGCSCI also produces and disseminates a 'National Synthesis Report' that provides a synthesis of all the findings and an overall analysis from the 30 assessed districts. The reports are subsequently disseminated nationally and at district level.

OVERVIEW OF WAKISO DISTRICT DURING FY2013/14

In terms of education, Wakiso district is ranked one of the best performing districts in national Primary Leaving Examinations results. Despite the good performance in national terms, service delivery indicators for the education sector in FY2013/14 showed a decline in the attainment levels of Grade 1 and Grade 2 when compared to the previous FY.

Figure 1: An overcrowded classroom at St. Joseph's C/U P/S Nansana, Nansana TC (Credit: ACODE Digital Library)

Water supply in the urban areas of Wakiso District is provided by the national water services while the rural areas access water from hand-dug wells, deep boreholes, shallow wells and protected springs; all of which are classified as safe water. Safe water coverage in Wakiso District stands at 64 per cent for the rural areas and 20 per cent for the urban areas. The functionality of water sources stands at 81 per cent while the safe sanitation coverage (latrine per household) stands at 92 per cent. However, access to water poses a serious issue and was repotedly as low as 25% in Nabweru sub-county (s/c). The quality of the water such as the content, colour, smell and taste was also cited as problematic by citizens in Mende s/c, Entebbe 'B', Kasanje s/c and Kira Town Council, among others.

Wakiso district is served with road network in a relatively fair condition. However, being a gateway to Kampala city with all the trunk roads passing through to other districts of Mukono, Mpigi, Mityana, Kalangala, Mubende and Luwero to Kampala City heavy and continuous traffic results in many breakdowns and road closures. Meanwhile, community roads were reportedly narrow and poorly maintained and featured potholes and a lack of culverts causing poor draining and rendering them impassable during rainy season in Namayumba s/c, among others.

FACTORS AFFECTING SERVICE DELIVERY IN WAKISO DISTRICT

Budgetary Constraints: In FY 2013/14, Wakiso District received UGX 49.06 billion of which central government funding, accounted for 91.7 per cent, local revenue and donor funds account for 0.07 per cent and 0.02 per cent of the district revenue respectively as shown in **Figure 3**.

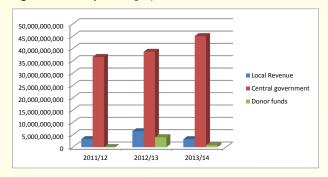

Figure 3: A Three year budget performance for Wakiso District

Although there was an increase in central government transfers during FY2013/14, central government disbursements were mainly allocated as conditional grants thus providing little or no room for there allocation of funds by WDLG to other service delivery priorities. For FY2013/14 this was particularly problematic because, compared to the financial requirements for projected service delivery requirements outlined by WDLGC in the district work plan, fewer funds were disbursed by central government. WDLG therefore faced an unexpected shortfall of UGX 10.54 billion. Despite having submitted a budget of UGX 59.6 billion, it only received UGX 49.06 billion.

Despite the various sources of revenue accruing

from the local economy endowments, WDLGC did not capitalize on opportunities to collect locally generate revenue. Generating local revenue is important to reduce reliance on central government funding and the fund activities that require substantial flows of local revenue. The ability of the local government to secure sources of local revenue determines the level of council facilitation to be received by the Councillors and thus the number of council sittings to be held.

The facilitation also supports the councillors to complete their oversight and monitoring of NPPA service delivery points as 20 per cent of locally generated revenue is constitutionally earmarked for these purposes. Without a reliable source of locally generated income and funding from the central government that cannot be reallocated, budgetary constraints are a key factor affecting service delivery.

The Growth of the District: Wakiso district is one of the fastest growing districts in Uganda with 15 subcounties, 6 town councils and one municipality. This description paints a picture of how much the district representatives have to do in terms of covering the various constituencies. Successfully fulfilling their political roles across a growing electorate and vast area, supported by the pre-existing remuneration and management structures, presents a challenge in effective service delivery.

Limited Support Supervision: The process of filling vacant positions in WDLGC is bureaucratic due to long staff recruitment process that requires permissive action from central government secretariats. This process has greatly impacted on service delivery as WDLGC staffing structures are not filled and the remaining members of staff remain mandated to carry out the district activities.

SCORE-CARD PERFORMANCE

The score-card parameters are derived from the mandate of the organs assessed as stipulated in the Local Governments Act. While all the four categories of WDLGC political staff are evaluated on their legislative and monitoring functions, the district chairperson, speaker and council are assessed against additional roles.

As the political head of the district, the district chairperson is also assessed on their political leadership as well as the initiation of and participation in development projects in their electoral area. The speaker is assessed primarily as a councillor with an additional scoring requirement of presiding over and the preservation of order in council. The district council, the highest organ in the district, is assessed against planning and budgeting requirements and in providing accountability to citizens.

POLICY RECOMMENDATIONS FOR IMPROVED SERVICE DELIVERY

From the Wakiso District Council Scorecard Report, it is recommended that:

- 1. Central Government increase budgetary allocation for WDLG to meet service delivery priorities;
- 2. WDLGC identify strategies to increase their local revenue from the available resources;
- 3. WDLGC institutionalize the production of monitoring reports by WDLGC leaders;
- 4. WDLGC intensify monitoring by both political leaders and administrative to check substandard works and minimize alarming rates of absenteeism and late coming by service delivery staff;
- 5. Government considers increasing the level of education required for one to qualify as a councilor to suite the technical engagement expected of them.
- 6. Increasing capacity building initiatives for council members/elected leaders on report writing, record keeping and minutes taking are pursued an implemented.

The full report on these findings can be accessed on ACODE's online information center at: <u>http://www.acode-u.org/</u>

About the Authors

Susan Namara – Wamanga is the lead researcher for Wakiso and Luwero districts under the Local Government Scorecard Initiative. Susan has also undertaken assessments in Kampala and Mukono districts and has been part of this initiative since its inception in 2009.

Martin Kikambuse Ssali is a district researcher in Wakiso district. Martin has also undertaken assessments in Kampala district, and has participated in the exercise.

Rona Ainembabazi is a district researcher in Wakiso district. She has participated in the district assessments.
